

# In-Home Seasonal Maintenance Program

Annual maintenance of your fireplace, stove or insert is recommended. A well-maintained appliance burns fuel more efficiently and more safely. Our trained technicians can determine whether replacement parts are needed to ensure that your hearth appliance is ready when you need it. We'd also like to remind owners of pellet and wood appliances to contact a reputable chimney sweep for an annual chimney cleaning.

In Home Seasonal Maintenance is booked from April 1-June 17, for service scheduled, on a first-come-first-served basis, through August. Our appointment calendar fills up fast. In order to have your appliance ready in time for the next heating season, we recommend that you call us to schedule annual maintenance for your hearth appliance during the summer. Call now at **978.829.0099**.
